

## CURRICULUM VITA

**Name:** Prof. Dr. Sahar Fahmy Youssef Mehanna

**Birth date:** 15.4.1964 - Port Said, Egypt

**Occupation:** Director of Suez and Aqaba Gulfs Branch and Head of Fish Population Dynamics and stock assessment lab, National Institute of Oceanography and Fisheries NIOF, P. O. Box 182, Suez, Egypt.

**E-mail:** sahar\_mehanna@yahoo.com

**Work phone:** +2 - 062 - 3360015

**Fax:** +2 - 062 - 3360016

**Mobile:** +201063770701

**URL:** <http://livedna.org/20.257>

### Education

**1997** Ph.D. (The study of biology and population dynamics of *Lethrinus mahsena* in the Gulf of Suez), Faculty of Science, Zoology Department, Zagazig University.

**1993** M.Sc., (Rational exploitation of kuruma shrimp *Penaeus japonicus* Bate, 1888 in the Gulf of Suez), Faculty of Science, Zoology Department, Zagazig University.

**1985** B.Sc., (**Excellent**) Zoology Department - Faculty of Science, Suez Canal University.

### Career history

**March, 2015:** Director of Suez and Aqaba Gulfs Branch, NIOF

**December 2014-March 2015:** Head of Fisheries Division, NIOF

**March 2013- December 2013:** Stock Assessment Program advisor in TCP/SNG/3402 Capacity building in fisheries stock assessment in GCC Project, FAO, GCC and Yemen, FAO.

**August 2013-Now:** Head of Fish Population Dynamics Lab, NIOF, Egypt.

**Sep 2011- Sep 2013:** Stock assessment and Fisheries management expert in Marine sciences and Fisheries Center, Ministry of Agriculture and Fisheries Wealth, **Sultanate of Oman.**

**2005 – 2011:** Head of Fish Population Dynamics Lab, National Institute of Oceanography and Fisheries NIOF, Egypt.

**Feb 2013-present:** Professor in NIOF (Fisheries management and stock assessment).

**2002 - 2012** Associate professor in NIOF (Fisheries management and stock assessment)

**1997 – 2002** Researcher in NIOF.

### **Research interest**

Fish Population Dynamics and aquatic resources assessment

Fish stock assessment

Fisheries biology

Concepts of aquatic ecology

Trophic modeling of aquatic ecosystems

Population dynamics of marine invertebrates with emphasis on shrimp, cuttlefish and crabs

Application of (predictive) fisheries yield models

Ecosystem management

### **Sharing in the following research projects**

- Stock assessment of fish resources in the Red Sea with special reference to the Gulf of Suez.
- Stock assessment of fish resources in the Suez Bay, Northern part of the Gulf of Suez.
- Stock assessment of fish resources in Wadi El-Raiyan Lakes.
- Ecology and fish resources management in lake Timsah and Bitter lakes, Suez Canal.
- Stock assessment and fisheries management of invertebrates with special reference to shrimp and the destructive impacts of trawl fishing in the Egyptian Red Sea Coast (PERSGA, Geddah).
- Ecology and Stock assessment of fish resources in the Foul Bay, Southern Red Sea (PI).
- Sustainable development of Zaranik protectorate and Lake Bardawil (Egyptian Academic Society for Environmental Development funded by GEF)
- Integrated coastal zone development of Port Said (EU).
- Stock assessment of Mediterranean fisheries based on trawl surveys using NIOF R/V Salsabil. (Scientific member on the R/V board and the head of fisheries team).
- Ecology and stock assessment of freshwater lobster as invasive species in the Nile River.
- Tuna fisheries management in Sultanate of Oman (The project's expert)
- Shrimp trawl fishing technique and its impact on the fish stocks in the Arabian Sea, Sultanate of Oman (the project's expert)

- Comparative study about morphometry and eco-biology of family Soleidae in the Mediterranean Sea between Egypt and Tunis (Egyptian PI).
- TCP/SNG/3402 Capacity building in fisheries stock assessment in GCC Project, FAO: Programme Advisor position
- National project (Sustainable development of North Sinai), Fisheries team leader
